## Residential Lifts:

Available from 180 to 1000 kg.

The top choice for reliability, flexibility and design, Octagon offer a range of lifts that are ideal for residential use.

### Features and Advantages:

- » High quality interior finish
- » European design and manufacture
- » Ease of installation and maintenance
- » Safety is integral to the design, for lift operation and maintenance
- » Designed and built to provide a long service life
- » Exceptional leveling accuracy of +/-3mm
- » Option for emergency evacuation in the event of power failure

### Technical features:

- » Ideal for low pit and headroom shafts
- » Minimum requirements for pit depth of 200 mm and headroom of 2700 mm
- » Save on construction costs with the design flexibility to build the lift shaft using brick, concrete or steel
- » High quality safety devices to protect the user and service technicians
- » Power supply available in single and three phase options
- » Standard and custom sizes available from 180 to 1000 kg

**Table 1:** Popular lift sizes

	Lift Sizes	
Max. Load kg	450	630
Persons	6	8
Shaft width mm	1550	1650
Shaft depth mm	1625	1775
Door opening mm	800	800 or 900
Car width x depth mm	1000 x 1250	1100 x 1400
Min Pit depth mm	400	400

Note: Technical details are for example only, not for final specification or construction.

## Lifts installed by Octagon:

450 kg lift: Melville Beach Parade

450 kg lift: Bateman Road

MODERN LIFE L310

CLASSIC ATHENA A510

MODERN LIFE L530

FUTURE TREND T711

## Platform lifts:

Cibes Platform Lifts offer a space saving and smart solution for access to new and existing buildings.

### Features and Advantages:

- » Affordably priced and fast to install
- » Low operating and maintenance costs
- » Load capacity from 400 to 1000 kg
- » Requires no separate shaft, machine room or pit, offering construction cost savings
- » Designed and made in Sweden
- » Install in new and existing buildings
- » Panoramic glazing available for 3 sides of the shaft to create a feature and light well
- » Select from a standard range of colours

### Technical features:

- » Screw driven platform offers reliable, long life operation and low power consumption
- » Three phase or single phase power
- » Select from a range of standard platform sizes and features
- » Door opening width from 700 to 1000 mm
- » Multiple door configurations available
- » Optional automatic door opener available depending on model and configuration
- » Minimum pit requirement reduces construction costs
- » Ideal for installation in existing buildings

**Table 2:** Cibes Platform Lifts

Cibes Platform Lifts			
Model	A5000	A6000	A8000
Load kg	400 or 500	400	1000
<b>Standard Platform Sizes - width x depth</b>			
	1000x1467	1100x1400	1405x1975
	1000x1467		1405x2475
	1100x1597		1105x2175
Pit	50	70	130
Min Headroom	2500	2700	2300

Note: All linear dimensions are in mm. Standard sizes are provided for example only and are not to be used for construction. Custom platform sizing available for A5000.

## Platform Lifts installed by Octagon:

Cibes A5000 - Webb St, Cottesloe:

Cibes A5000 - Webb St, Cottesloe:

A5000 Glass Shaft - Eight Avenue, Maylands:

A5000 - Dale Christian School:

Existing building - Christchurch Grammar:

A5000 - Notre Dame:

## Service Lifts / Dumbwaiters:

50, 100 and 300kg capacity.

BKG Service Lifts offer exceptional reliability and a long service life.

### Features and Advantages:

- » Made in Germany by BKG (Bunse-Aufzüge GmbH), a world leader in Service Lifts
- » BKG manufacture more than 2500 service lifts each year, that are designed and manufactured to the highest standards
- » Octagon is BKG Lifts' technical and sales agent in the Asia-Pacific region (since 1983)
- » With over 30 years' experience, Octagon can offer reliable and consistent service, support and expertise
- » BKG lifts are used worldwide in commercial kitchens and the marine industry, with an unrivaled record for reliable performance with heavy duty workloads

### Technical features:

- » Self-supporting structure is standard
- » Motors supplied in single or three phase
- » Loading is available on one side, opposite sides or adjacent sides
- » Lift machine can be positioned above, below or beside the shaft
- » Sizing available in 50 mm increments

**Table 3:** Standard Service Lift sizes:

	BKG Service Lifts
